Social Intervention and Sustainable Development in the Contemporary Society

Abstract

Sustainable development is the development that meets the needs of the present without compromising the ability of future generations to meet their own needs. Sustainability is a process which tells of development of all aspects of human life affecting sustenance. It means resolving the conflict between the various competing goals, involves the simultaneous pursuit of economic prosperity, environmental quality and social equity. Interventions which foresee sustainability is the need of hour. Sociology as an academic discipline seeks to improve the quality of life and subjective well-being of individuals, groups, and communities through research, policy, community organizing, direct practice, crisis intervention and teaching. This seminar aims to understand the role of society in developing a sustainable environment.

Sub -Themes of the Seminar:

1. Social Intervention and Sustainable Development
2. Environmental sustainability
